## Face & Neck Lifts

A new, minimally-invasive alternative to the face lift. The Silhouette Thread Lift offers younger, fresher look without the higher risks associated with a full surgical face lift, making it ideal for those looking for a more 'up-lifting' look.

## Macrolane Breast and Body Enhancement

Increase your bust one to one and a half cup sizes without surgery!! Now there's a non-surgical body shaping product that can naturally regenerate body contours. Macrolane is an innovative product used for breast enhancement, volume restoration and body shaping.

## Vaser Liposuction

Get the body you want with Vaser Liposuction. People come in all different shapes and sizes. Every body type has areas that are predisposed to fat storage and, even with rigorous diet and exercise, those unwanted bulges often persist. This technique performed under local anesthetic now offers a safe alternative for ridding yourself of those stubborn fat deposits to provide you a smooth new shape with fast recovery. Vaser Lipo has been the choice for thousands of men and women. It's a successful way to remove unwanted fat on just about any part of your body including: Arms, Hips, Chest, Breasts, Knees, Ankles, Stomach, Chin, Back, Buttocks, Neck, and Thighs.

## Laser Hair Removal

We use advanced IPL technology passed by the FDA to remove unwanted hair. A course of treatment is advised the number depending on the area, age of patient, colour of hair and hormonal response. Treatments are scheduled several weeks apart to achieve optimal results.

## Facial Veins

The face has an extensive network of veins and tiny blood vessels called capillaries. Over time, aging, traumas, sun exposure, and certain lifestyle factors cause a number of them to break appearing as red streaks of blotches on the face. IPL therapy can eliminate damaged veins and capillaries by removing virtually all traces of these unsightly blemishes.

## Photorejuvenation

Photorejuvenation is a breakthrough in age-defying skin care. IPL technology treats skin damage non invasively. Treats age spots, freckles, rosacea, birthmarks, acne scarring and unsightly veins.

## Rosacea

People with rosacea flush easily and can develop redness, pimples and thread veins on their cheeks nose and forehead. It usually starts in the second or third decade of life, it affects about 10% of adults. The active flare ups when spots break out are best treated with antibiotic creams or tablets. IPL lasers are used to treat the redness and broken veins.

## Sun Protection & Age Spots

Almost everyone has a pigmented lesion of some type. These areas of the skin contain especially high concentrations of melanin and are typically caused by an excess of pigment commonly due to sun exposure, aging or congenital factors. We use laser technology to treat these and we recommend that everyone wear an SPF 30 daily.

## Fractionalised Laser Skin Resurfacing

Non-Ablative Skin Resurfacing, the latest in digital laser technology, provides an alternative non invasive treatment to rejuvenate the skin and improve its appearance, texture and tone with maximum results and minimum downtime. Fractional Laser can be used on the face, hands, neck, chest and décolletage area and is extremely effective in the treatment of melasma, acne scars, stretch marks, improving pore size, smoothing out wrinkles around the eyes and mouth, improving skin tone and texture

## Microdermabrasion

Pristine uses densely packed real diamonds to gently remove top layers of the epidermis while its suction control stimulates collagen and elastin production in the dermis for improved blood flow, and firmer, healthier looking skin.

## Facial Peels

---

At Derma Clinic we use three types of peels, depending on your skin condition. They are classified as:

- Light peels- glycolic peels, salicylic peels
- Medium peels-TCA peels
- Medium to deep peels-Obagi blue peels.

## Tattoo Removal

---

The laser delivers high intensity light in pulses of a few billionths of a second into the treated area. The tattoo inks selectively absorb the light without damaging the normal surrounding skin tissue in the process. The tattoo ink is broken into smaller particles that are then harmlessly removed by the body in the weeks following treatment.

## Wrinkle Reduction

### (Botox® Dysport®)

---

It is injected in miniscule amounts into the muscle causing the muscle to relax and thus diminish or eliminate the line or wrinkle. This treatment softens facial expression giving a natural looking youthful appearance. Used mostly to treat forehead lines and lines around the eyes. Lasts 4-6 months. These injections can also be used to treat migraines and excessive sweating.

## Cosmetic Fillers

---

Cosmetic fillers provide long lasting dramatic results for improving the appearance of facial lines, wrinkles and folds. This non surgical solution restores volume and fullness to the skin,

plump up lips and fill in scars. It lasts 9 to 12 months the results are immediate bestowing you with a youthful and invigorated look.

## Acne Therapy

---

We offer a free consultation where detailed clinical assessment may be carried out to prescribe the appropriate treatment. Single or combination treatment may be prescribes these may include:

- Glycolic skin care program
- Benzol peroxide program
- ClearLight TM Acne Therapy

## Minor Surgery

---

Which conditions can be treated?

Medical skin care programme  
Peels and microdermabrasion  
Clearlight TM Acne therapy  
Fractional skin resurfacing for scars.

## Leg Veins

---

The Nd yag and IPL laser successfully treats leg veins both small spider veins and large blue veins. The laser works by emitting a light that is passed through the skin and absorbed by the haemoglobin (the red portion of blood). This causes the vein to breakup and disappear. Normally two to three treatments are needed. Resolution of the unwanted vein will take place over several weeks or months.

## Mesotherapy

---

A new aesthetic procedure for countering the effects of sun-damaged skin. Diminishing the

appearance of crêpey skin on the face, backs of hands and décolletage by rehydrating the skin to promote smoother and healthy looking skin.

## Skin Care at Derma Clinics

---

The Derma Clinics offer a number of Cosmeceuticals skin care brands. Each medical based skin care ranges providing optimum level of ingredients to provide the most effective response. It is recommended to have a consultation so a comprehensive skin analysis is performed to choose the most appropriate skin care programme for you.

## Jan Marini Skin Research

This professionally supervised program that helps your skin appear dramatically clearer, younger, and smoother, and addresses common skin concerns such as:

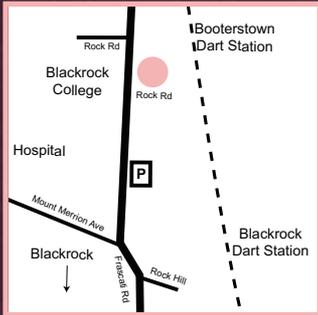

- ageing and photodamaged skin, acne, Rosacea, Skin Discoloration and more

## Obagi Medical

Obagi Systems range provides prescription-strength skin care solutions that achieve the transformation results you want. They transform your skin at a cellular level to look, act younger and healthier.

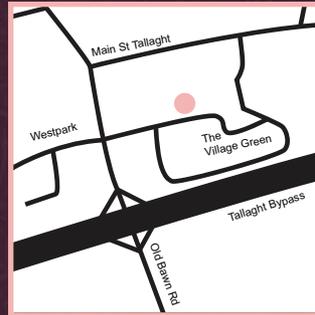

## Epionce

Is a comprehensive and innovative skin wellness line designed to optimize the appearance and health of the skin by working at the core of the skin's own protective and reparative systems. Combining a unique sub-layer delivery system and patent-pending botanical formulations, Epionce is a new paradigm in skin wellness.
